

DELETE GPSD

The DELETE GPSD command terminates an active GPS Daemon. When you issue this command, processing stops immediately.

Syntax: `DELETE GPSD ID=id`

Arguments: `ID=` - The `ID=` parameter used to define the GPS Daemon.

Example:

```
IPN237I delete gpsd,id=gpsd1
GPS922I GPSD1 GPS Shutting down
GPS924I GPSD1 GPS Shutdown complete
```

Related	DEFINE GPSD	- Create a General Print Server Daemon.
Commands:	QUERY GPSDS	- Displays the status of the General Print Server Daemons.
