DOWNCHECK

The DOWNCHECK command controls whether or not a confirmation is required when the SHUTDOWN command is entered.

Syntax: `DOWNcheck {ON|OFF}`

Arguments: ON - When a SHUTDOWN command is entered, the operator is prompted for verification. Default.

OFF - An operator SHUTDOWN command takes affect immediately, without a prompt.

Example:

```
IPN237I downcheck on
IPN268I DOWNCHECK now set to ON
```
