

SET POWERUSERID

The SET POWERUSERID command establishes the userid that TCP/IP will use when accessing the POWER queues.

Syntax: SET POWERUserid=*string8*

Arguments: *string8* - 1- to 8-character string, case insensitive

This userid to use for POWER access. The default user id is "SYSTCPIP".

Example:

```
IPN237I set poweruserid=SYSTCPIP
IPN268I POWERUSERID now set to SYSTCPIP
```

Related Commands: SET POWERPASSWORD - Establish the password for POWER access.
